

External-ST triage — GSE230424 + GSE248205 (n=12 slides total)
DM1 shows independent thyroid-lineage anti-correlation; not an inflammation artifact

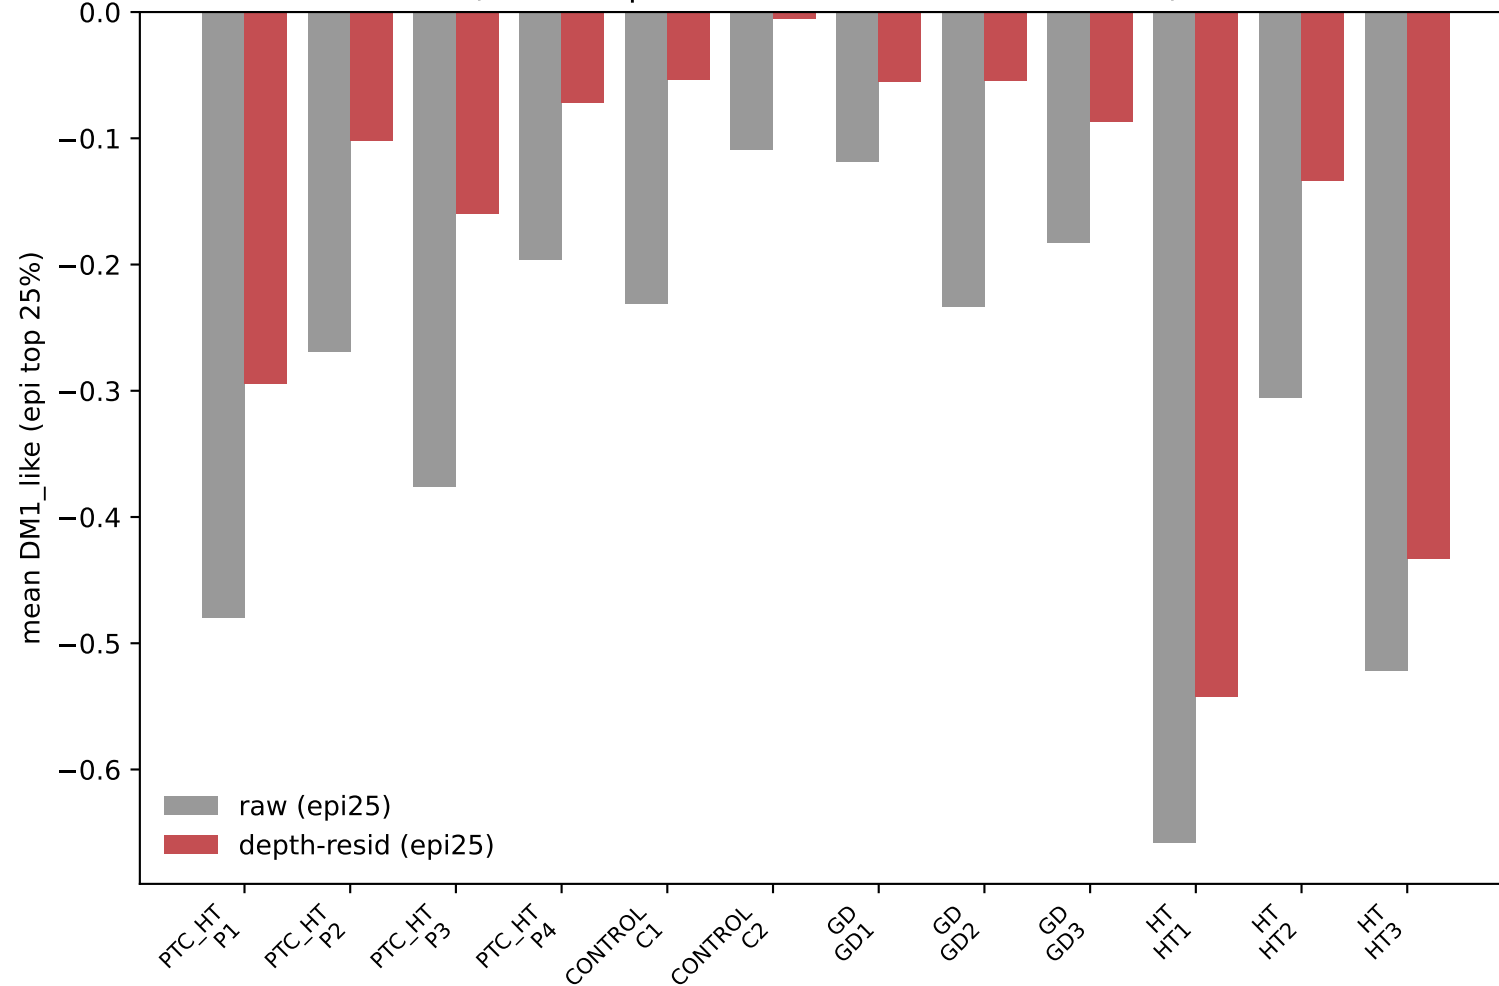

A. DM1_like (depth-corrected, epi top 25%) by condition
black bar = condition mean

B. Independent lineage validation
all 12 samples Spearman $\rho = -0.94$, $p = 7.0e-06$

C. Raw vs depth-residualized DM1_like per sample
(raw is depth-confounded; resid is the truth)

D. DM1 by condition (depth-corrected, epi top 25%)
autoimmune (HT/GD) NOT elevated vs CONTROL
