

Evidence-to-claim matrix: impact with explicit claim boundaries

actual data

blocked overclaim

strict current-label operating point

3

Top-13; TP=13; FP=0

not external SOTA, not clinical utility, not universal precision

source-stratified current-label audit

2

3 source rows; aggregate FP=0

not a source-heldout external validation

paired TCR-resource evidence

2

6/13 strict Top candidates have paired TCR evidence

not direct T-cell activation proof

OpenMM structural audit

2

2/13 strict Top candidates have MD_MODERATE-or-better labels

not immunogenicity proof and not a substitute for WT/decoy controls

GADGVGKSAL case

3

mainDL=0.770; TCR=0.960; MD=MD_MODERATE

needs WT/decoy assay readout before immunogenicity claim

HMTEVVRHC case

3

mainDL=0.467; TCR=0.983; MD=MD_VERY_STRONG

WT sequence curation remains a blocker before specificity claims

wetlab control plan

2

13 plate-plan rows with WT/decoy/go-no-go columns

the assays have not been run yet
