

Classical/non-classical decoupling vs DM1 (TCGA-THCA)

HLA gene-expression module - not allele genotype. Cancer-cohort allele genotyping is out of scope per separation rules.

DM1 x HLA-G-decoupling
 $\rho=0.006$ $p=8.87e-01$ $n=527$

DM1 x HLA-E-decoupling
 $\rho=-0.387$ $p=2.98e-20$ $n=527$

DM1 x HLA-F-decoupling
 $\rho=-0.291$ $p=1.04e-11$ $n=527$
