

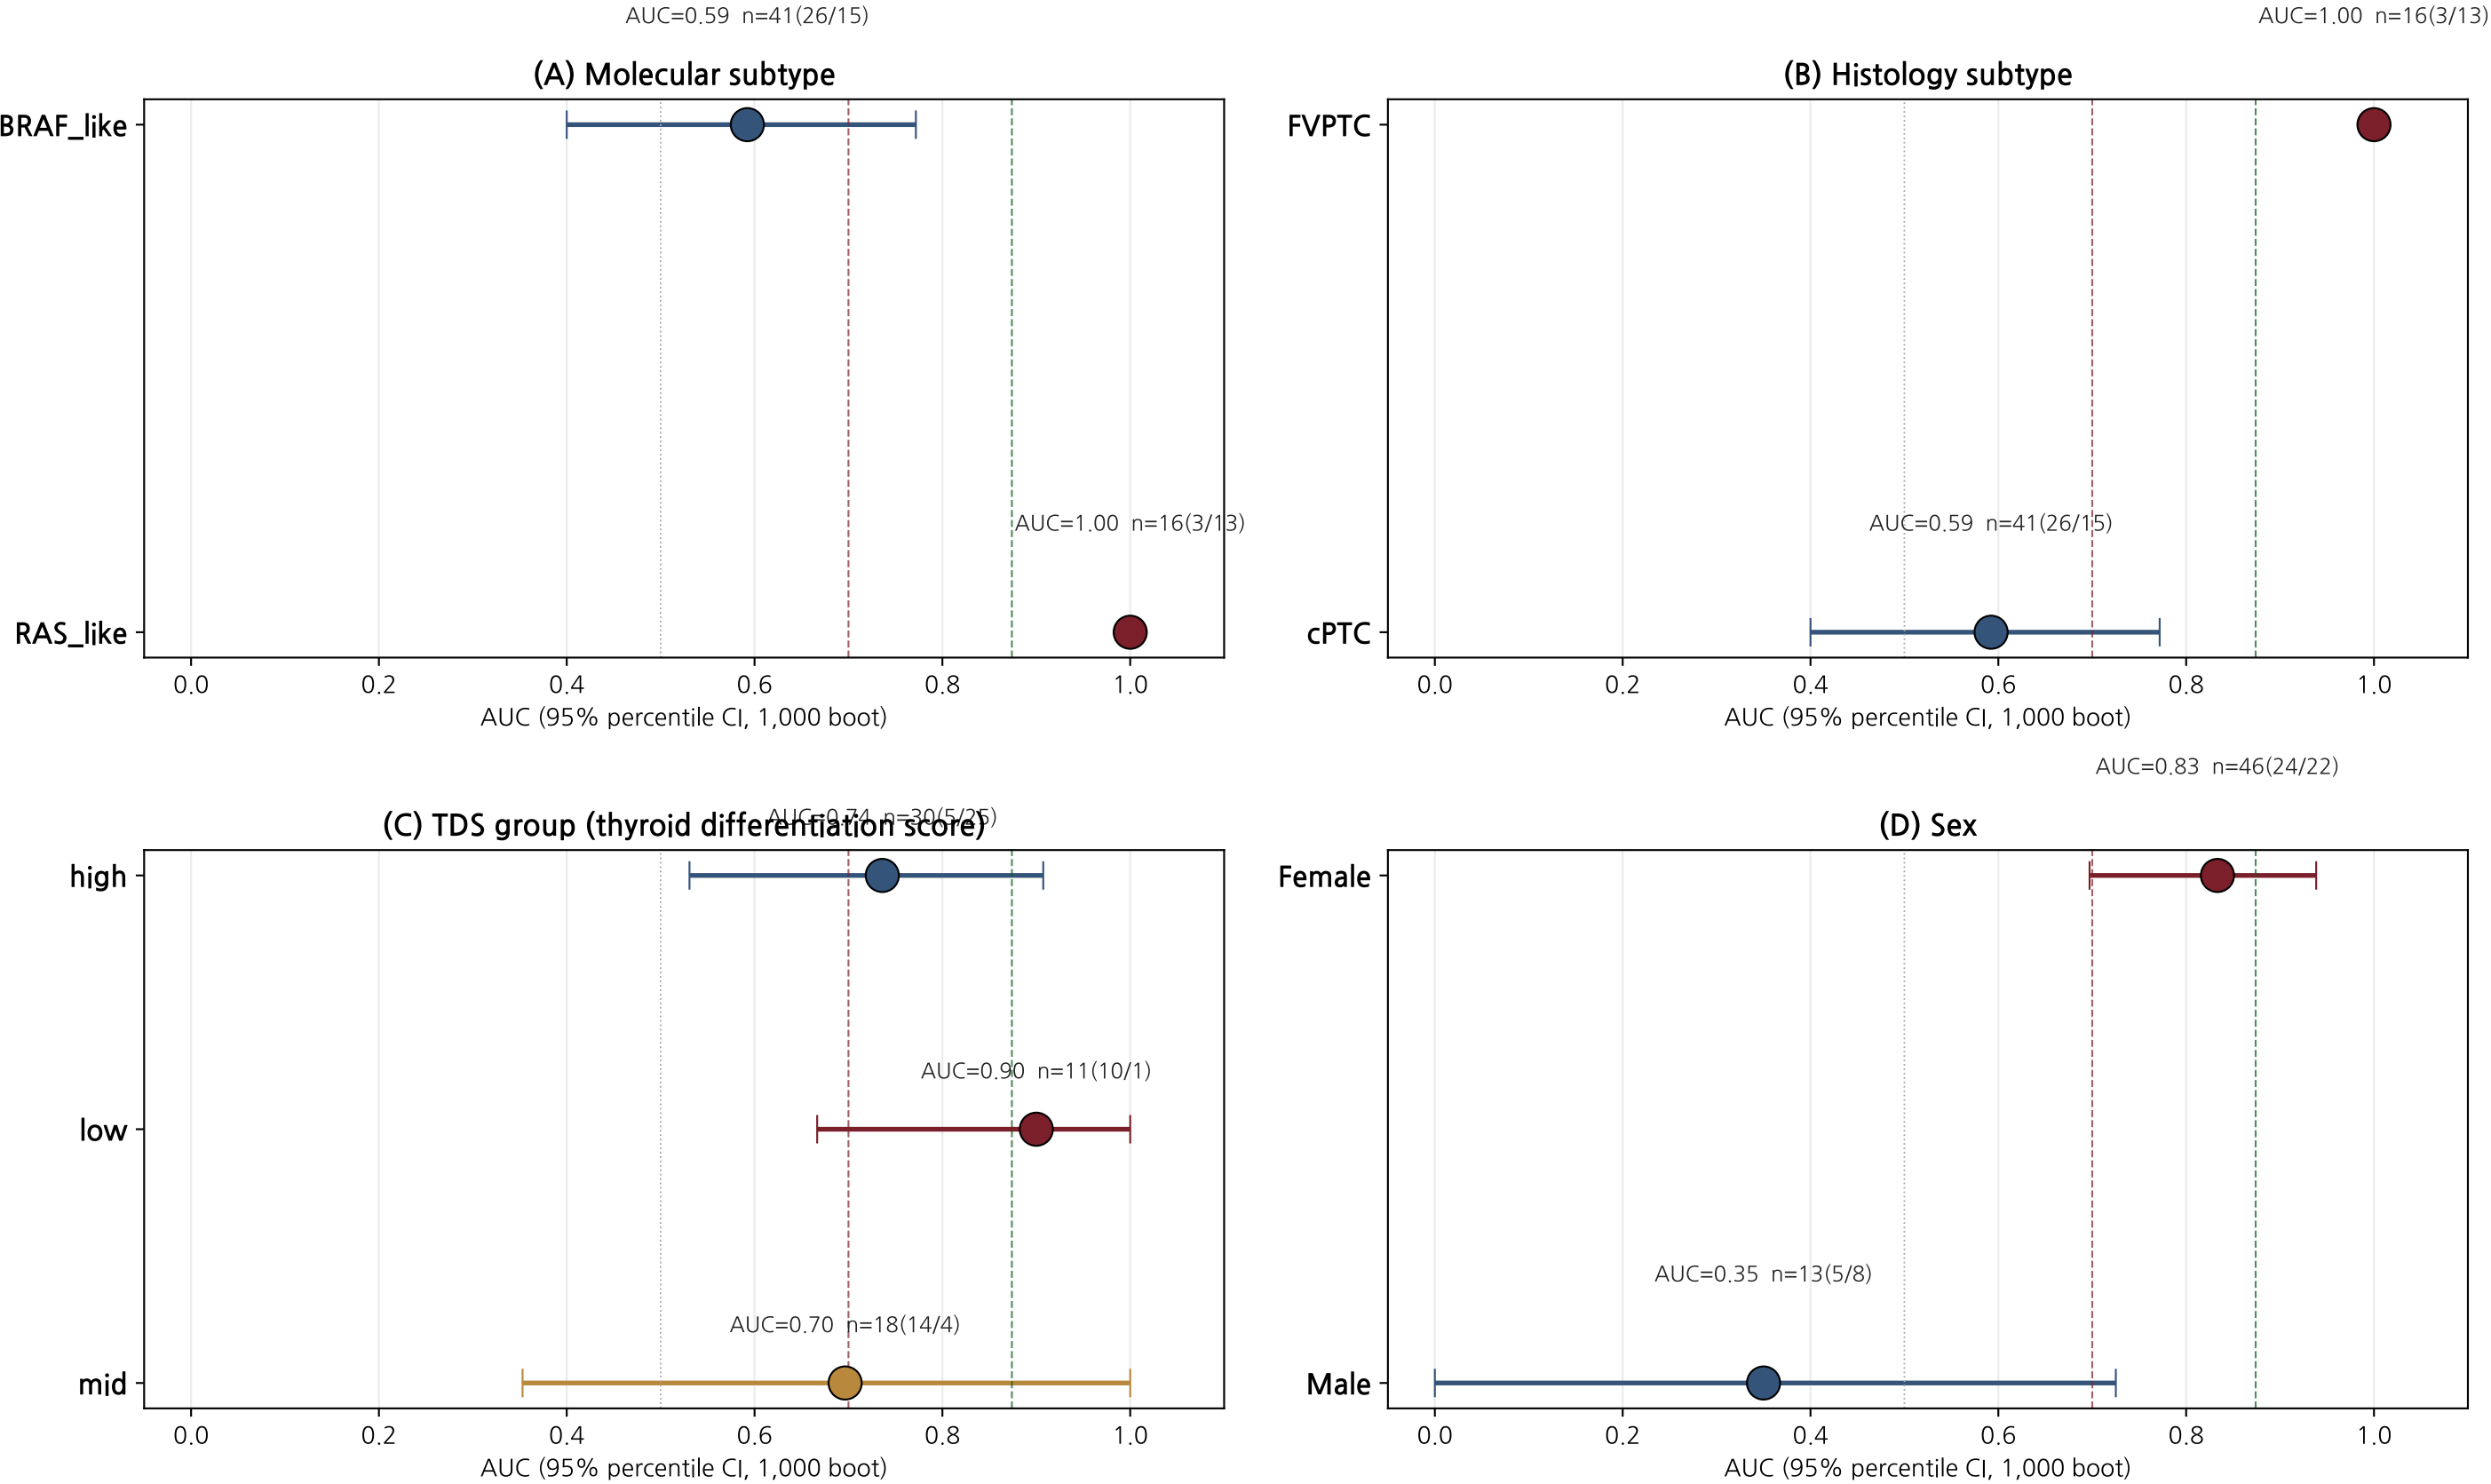

Figure 17. Subgroup AUC — molecular / histology / TDS / sex strata 4-panel forest

Red dashed = pre-reg kill-switch 0.70. Green dashed = overall UNI pooled 0.874. RAS-like / FVPTC strata reach AUC = 1.000 (perfect separation, n=16 each). BRAF-like / cPTC AUC = 0.592 (n=41) — performance asymmetry by driver/histology.
