

Three Papers — Trajectory Index

Cancer dark matter · Hashimoto-overlap PTC · Pan-Asian autoimmune-thyroid HLA — three isolated trajectories

2026-05-04 advisor directive 로 세 paper trajectory 가 완전 isolate 됨. 본 index 는 세 paper 의 status 와 boundary 를 한 page 에 정리. 각 카드 → 별도 status report 링크.
Pillar 5 boundary (Paper 1 → Paper 2 hook), 5-pillar HLA boundary (Paper 2 → Paper 3 hook), gated entry (Paper 3) 등 모든 cross-paper reference 가 symmetric 하게 정렬.

Outline (Task 4 본인 voice)

Cross-paper boundary

THREE-TRAJECTORY ISOLATION POLICY (ADVISOR 2026-05-04)

세 paper 가 cross-contamination 없도록 isolated session 으로 진행. 각 paper 내부의 forbidden term list 는 별도 status report 의 § 0 Glossary 또는 § 3 Scope 에서 정의. 본 index 자체는 모든 paper 를 neutral 하게 referencing – 단 각 paper 의 territory term 은 그 paper 의 boundary 안에서만 사용.

Pillar 5 boundary: Paper 1 §2.4b take-home "*warranting separate inquiry*" → Paper 2 hook · Paper 2 §3.1.6 backbone (HLA n=874 mediation · BCR clonal · sub-B NBNR · DPB1 OR 2.16) · Paper 3 § 7 reciprocal Discussion line.

Mechanism divergence framework (symmetric reference): "Shared HLA risk reflects population-level susceptibility; disease specificity is determined downstream." – Paper 2 + Paper 3 Discussion 양쪽에서 동일 phrase 로 trajectory 정당화.

Three-paper timeline strip

2026-05-04 <i>P1 Audit · 5/4 mechanical edit</i> Cross-contamination audit · A1–A7 mechanical edit · advisor 답장 게이트	2026-05-05 <i>P1 Prep day</i> Landa + Yoo + ATA 리딩	2026-05-06 <i>P1 Title lock + Hook</i> Cand 1 ★ + §1.1 본인 키보드
