

Figure E. Confound landmines — sex asymmetry + TSS center imbalance

AUC=0.35 n=13(5+/8-)

E1. Sex-stratified AUC — Male is worse than random

E2. TSS distribution among 16 RAS-like slides

EM (10/16, all DM2) vs DJ+FK (3/16, all DM1) — molecular subtype confounded with TSS scanning center. Sex: model worse than random in n=13 Males.
