

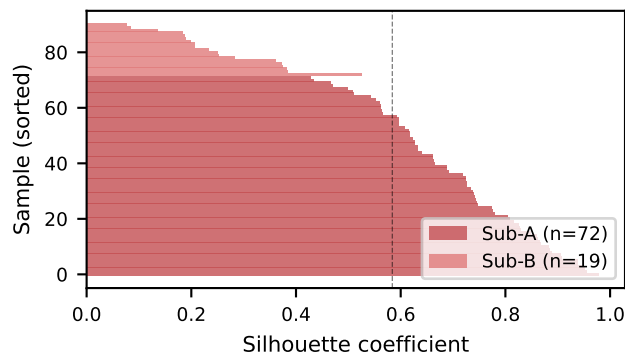

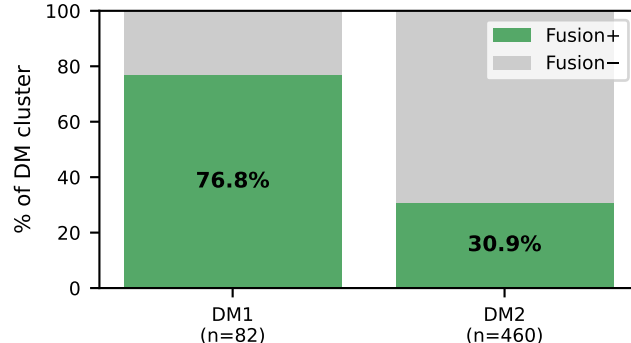

Figure 7. DM1 is a fusion-driven dark matter subtype with mechanistic heterogeneity.

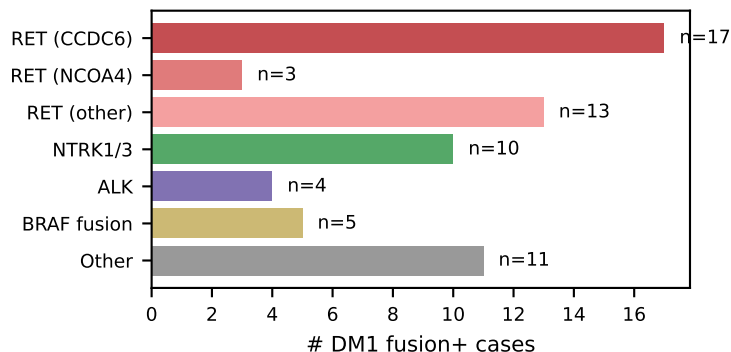

(A) DM1 sub-A vs sub-B silhouette
(score = 0.584)

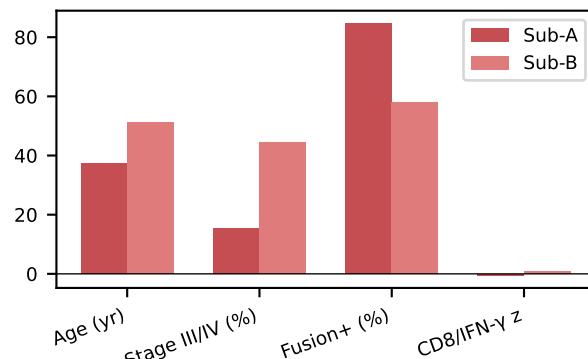

(B) Fusion enrichment
Fisher OR 7.41 (CI 4.4-12.6), $p=1.9e-13$

(C) Fusion partner spectrum
(DM1 fusion+, n=63)

(D) Sub-A vs sub-B phenotype

(E) DM1 captures 81.8% of TCGA RET+
(reflex testing algorithm)
