

8-gene panel $\subset$ TDS-16 $\subset$ eTDS-64 — parsimony with field-canonical containment
Parsimony (Paper 1 Round 8 audit on TCGA-THCA)

Containment diagram

8-gene captures 98.9% of TDS-16's AUC at 50% gene cost · Spearman $\rho = 0.954$

→ Manuscript argument: parsimonious panel that lives inside the field-canonical iodide-handling signature space.

Caveat: Boucai eTDS-64 exact roster (Supp S4) is JS-gated on PMC; containment claim rests on Boucai's published Methods statement.
