

TCGA-THCA — 8-gene differentiation panel vs documented radioiodine treatment response (GDC BCR Biotab, mCi-dosed courses)

a · Response to radioiodine, TCGA-THCA

d = -0.03 [-0.50, +0.46] · P = 0.731

b · Adjusted logistic model (n = 167)

c · Ordinal response gradient

Spearman rho = -0.036 · P = 0.646
